The Lowell Area Community Fund supports both long and short-term projects.

In our 2019-2020 fiscal year, the Lowell Area Community Fund invested in two ongoing projects, the first with the Kent County Youth Agricultural Association. This September 2019 grant was made to support moving the fairgrounds of the Kent County Youth Fair from Recreation Park in the City of Lowell where it has been since 1935, to 140 acres in Lowell Township. This move will provide Lowell and West Michigan with a premiere venue to host a multitude of agricultural and community events, while continuing to provide youth with opportunities to develop essential life skills and foster a love for agriculture that they showcase at the annual Kent County Youth Fair.

In April 2020, the Community Fund was also proud to support the Lowell Showboat, which is an icon in the community. The City of Lowell hopes to have the Showboat completed this winter. The Community Fund made more than $60,000 in emergency grants to organizations affected by the COVID-19 crisis.
